

## BuddyPress

Thanks to the integration with SportsPress, you can combine SportsPress player profiles with BuddyPress profiles and allow your team members to add as many or as little details about themselves.

## WooCommerce

When you pair WooCommerce with SportsPress, you can add a new section for team merchandise to every team you manage on your website. Products can also be filtered by teams and you can display the shop either in the main profile section or within a tab.

## WordPay

WordPay is a powerful membership plugin for WordPress that allows you to create different membership levels and collect membership dues from your team members. You can set the payments on a one-time or a recurring basis and accept payments via Stripe, PayPal, Express Checkout, and Payments Pro.

## Yoast SEO

With Yoast SEO extension, you can use advanced variables to generate search engine friendly page titles for your SportsPress pages based on your custom rules. You can also choose to include certain match details like team name, date, time, and the competition each event belongs to in match page titles.

## Event Tickets for SportsPress

This extension makes it easy for visitors to RSVP to your events and you can use it together with WooCommerce to easily sell tickets. Thanks to the RSVP feature, you'll instantly know how many visitors you can expect which makes it easier to book an appropriate venue for your match. You or your team manager can then quickly check them in when the event begins.

## Facebook Extension

If you want to encourage visitors to follow your Facebook page and keep up with team updates, use the Facebook extension for SportsPress. You can display Facebook pages for all your teams, show most recent posts and events created on Facebook as well as allow fans to message your page directly.

## Twitter Extension

If you prefer Twitter, then you won't want to miss this extension. Use it to display your Twitter feed and control how many tweets should display and where on the page they should appear. You can display tweets from each user or choose to focus only on the main team account.

## Live Scores for SportsPress

Using this extension, you can display scores in real time as the match is happening and even add your own written commentary directly to your site.

## League Table Importer for SportsPress

This helpful extension allows you to upload your league tables as a CSV or an XML file. You can select an existing league table to update the imported teams with the existing teams or the team will be created automatically if selected.

## SportsPress for Baseball

With the Baseball extension, your events will be renamed Games and give you access to features such as the ability to add own goal reporting, baseball branding, pitching and batting stats, and more.

## SportsPress for Cricket

You'll gain access to cricket tools such as separate batting and bowling statistics, a row to display extras, and players who did not bat.

## SportsPress for Golf

This extension includes golf features such as scorecards, courses, holes per round, par per hole, handicap adjustments, leaderboards, and individual profiles for players.

## SportsPress for Soccer

Soccer teams will enjoy our soccer extension that adds soccer admin branding and own goals reporting as well as fixtures and results and football field information and individual player profiles.

## SportsPress for Basketball

Our last extension is perfect for basketball teams and includes features that will help you display fixtures and results, add information about your basketball field, display starting lineup and benched players, and more.
